-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 55, 56, 58, 68, 69, and 71, rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 55 and 68, the anchor assembly has been defined as being “attached to the top end of the vertical support”, in independent claims 52 and 64. However, in claims 55 and 68, the anchor assembly has been recited as having a brace coupled to the bottom surface of the horizontal support. Correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 52, 53, 55, 56, and 58-63 are rejected under 35 U.S.C. 102(b) as being anticipated by Palmer #6,039,150. Palmer, as best seen in Figure 2, discloses a scaffold bracket for a building comprised of horizontal support 40, vertical support 42, 56, a vertical safety post 28, 30, an L-shaped brace 78 secured to the bottom surface of the horizontal support, which can receive a beam/cross-support therein, and an anchor assembly 70, which is attached an upper end of the

Art Unit: 3634

vertical support, having an inwardly extending horizontal plate portion and a downwardly extending vertical plate portion that together engage top and inside surfaces of a beam/cross-support 15, respectively.

Claims 64-66, 72, 75, and 76 are rejected under 35 U.S.C. 102(b) as being anticipated by Knauth #6,003,631. Knauth, as best seen in Figures 2, 4, and 5, discloses a scaffold bracket comprised of vertical support 20 attached at a lower end to horizontal support 30, and a substantially T-shaped anchor assembly 27 having a horizontal plate (unnumbered) having a vertical plate 29 depending therefrom that is securable to structural element 100.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 52-56, 58-69, 71, 72, 75, and 76 are rejected under the judicially created doctrine of double patenting over claims 1-25 of U. S. Patent No. 6,722,468 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter,

Art Unit: 3634

as follows: the structure of the anchor assembly as claimed, specifically, the first and second plates adapted to engage top and inside surfaces of cross-support, an L-shaped brace, and horizontal and vertical supports.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Response to Arguments***

Applicant's arguments with respect to claims 52-56, 58-69, 71, 72, 75, and 76 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Specifically, the applicant has now recited a vertical safety post in claim 52 and a T-shaped anchor assembly in claim 64. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3634

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson #5,582,376 and Lapp #5,503,358 are cited to teach bracket supports.
